

**No clogging**  
**No**  
**product dilution**

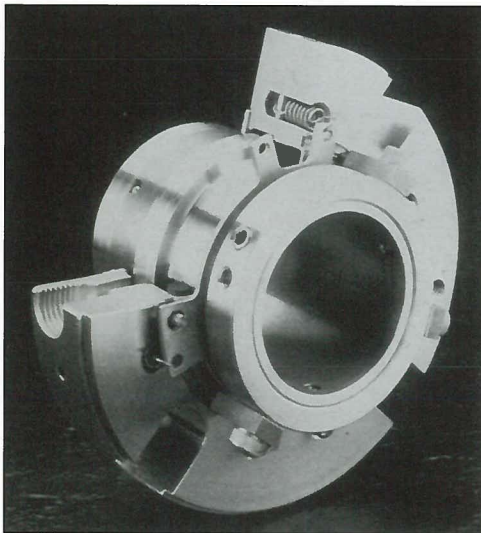

**No leaks**  
**No pollution**

Tyton Mechanical Seals all feature exceptional reliability and superbly simple engineered designs. Pre-assembled, pre-aligned cartridge units, Tyton seals are balanced and self-aligning - ready to install with ease. They are available with various hard face and carbon face materials in combinations that match your particular applications. Each is manufactured to extremely high quality standards and is backed by dependable Tyton service. Installing Tyton Mechanical Seals is an investment in problem-free operation for years to come...

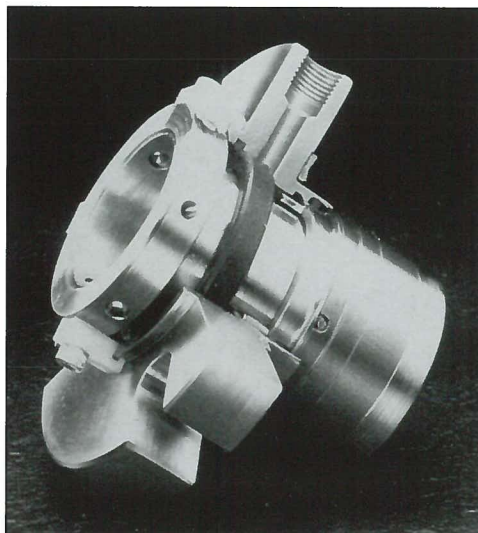

**Designed directly for each application**

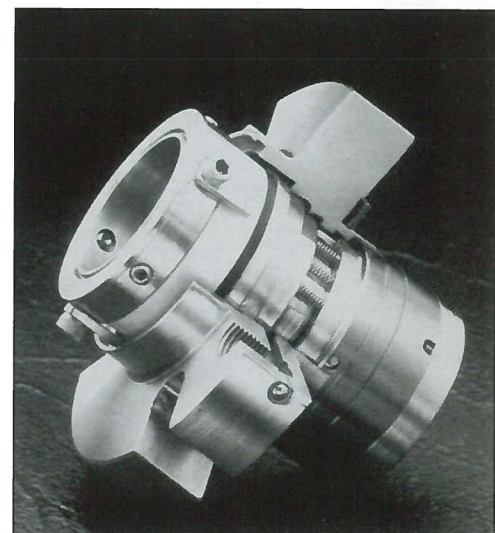

**TH877 for stock**

Truly non-clogging springs, protected in gland ring, isolated from product path. Flush inlet port prevents concentration of particles and abrasives, cools and lubricates to extend seal life. Ask for Bulletin T101.

**TH865 for liquor**

Single acting cartridge quenched seal which does not dilute product. With-stands black and green liquors, heavy caustic sodas and gives long, trouble-free service. For more details, request Bulletin T102.

**THD677 for chemicals**

Heavy duty seal for higher temperatures and pressures features barrier fluid between seal faces. Ideal for hazardous/toxic products (strong black liquor at high temp., chlorine dioxide, etc.) Reduces contamination in effluent water. Ask for Bulletin T103.
